
Subject: setting text in editable combobox widgets

Hi everyone,

I was wondering if it is possible to set the current text of an editable combobox widget? If you want so, I'm looking for the counterpart of `widget_info(/COMBOBOX_GETTEXT)`.

I don't like to use a workaround like `widget_control, COMBOBOX_ADDITEM='hello world', COMBOBOX_INDEX=0` which adds a new entry to the list of values.

Thanks
Andreas
