Dear all,

when opening IDL, the software will show as follow:

Multiple operations have reported errors. select an error to view its details.
An error has occurred. See error log for more details.
java.lang.NullPointerException

why and how to solve this problem?

Thank you all!
Liu

What IDL version are you trying to run? What OS are you on? In the default workspace for your

version there should be a .metadata folder with a file in it called .log. What are its contents? You can also run the idlde executable with the -debug argument, which should cause a shell to come up with extra error information in it as well.

Thanks,
Scott

Hi, Scott

Thanks you for replying.

My IDL is version 7.0, OS is Win7, but it can be installed in the X86 folder.

I have checked the error log as below:

```
!ENTRY org.eclipse.help 4 0 2013-03-29 11:06:04.666
```

```
!MESSAGE Unable to look up label for help keyword index topic
```

```
"/com.rsi.idl.doc.wv/Restricted_Rights_Notice.html" with missing "label" attribute (topic does not
exist in table of contents; using href as label)
```

```
