Hello everyone,

Please let me know how to get .eps or .jpeg files as output instead of ps files. Because I couldnt include ps files in latex and if I convert ps to eps or jpeg the resolution is coming down. So Please help me in this.

thanking you in advance,

sid.

If you are using latex I suggest to convert your figures to pdf instead, to take advantage of the vector format

I do this all the time - output a figure as EPS to include into a latex document.

If you're using the Coyote library, you'll want:

```
PS_START, /ENCAPSULTED...
```

```
...
```

```
PS_END
```
