The SMOOTH function does not seem to be smoothing anything for me. Am I missing something?

```
IDL> print, smooth(findgen(10), 3)
```

```
  0.00000  1.00000  2.00000  3.00000  4.00000  5.00000  6.00000  7.00000
  8.00000  9.00000
```

```
IDL> print, !version
```

```
{ x86_64 darwin unix Mac OS X 8.0 Jun 17 2010    64    64}
```
