Hi all,

I'm not sure whether this problem about the new legend function in IDL 8 has been solved. But in IDL 8.2, the position of the legend keeps changing when I resize the window .

I couldn't find any other information online except an earlier post by David Fanning. But that's a long time ago in 2011. Now could someone please tell me whether this bug has been fixed? and in which version?

I'm using IDL 8.2 on Mac 10.8.

Thanks.

Xin Tao
