Folks

hi,

I need to the year that i have in my ASCII file to the iplot ([http://imageshack.us/content_round.php?page=done&l=img846/9223/20120128132324.png&via=muplo ad&newlp=1](http://imageshack.us/content_round.php?page=done&l=img846/9223/20120128132324.png&via=muplo%20ad&newlp=1)) that i

have. that means i have a 3 column data: first and second are x and y and 3 rd one is the year that i have for each x&y i just want to put the year on the iplot.

Any idea would be appreciated.

Cheers,

Dave
