Folks

hi,

I am converting an image from raster to png in ubuntu and i am having this error:

```
bash: ${lenRemainder}: substring expression < 0
```

```
Reading crop information from: ./20060505.res
```

```
Image Width ..5176..
```

```
Image Format ..ci2..
```

```
cpxfiddle: command not found
```

```
Converting A_20060505_crop.ras to format: png...
```

```
convert: improper image header `A_20060505_crop.ras' @ error/sun.c/ReadSUNImage/302.
```

```
convert: missing an image filename `A_20060505_crop.png' @
```

```
error/convert.c/ConvertImageCommand/2940.
```

```
There was a problem with imagemagick (convert) when I ran: convert A_20060505_crop.ras
```

```
A_20060505_crop.png
```

```
Name of rasterfile: A_20060505_crop.png
```

and at the end i do not have the *.png image can some one please tell me what is going on?

Cheers,

Dave
