Hi everybody,

does anybody know if there exists an update of cgContour which would allow logarithmic Y axis ?

My last update from Coyote Library was from 9 months ago.

Thanks!

Alex

? My last update from Coyote Library was from 9 months ago.

Well, nine months is ancient history in the life of a Coyote Library, which is updated 6-8 times a month, on average. But, have you tried setting the YLog keyword?

Cheers,

David

Hi David, of course I did try setting YLOG. It made the white plot.

Humm. Mine worked. Maybe something else is wrong. Did it throw errors?
Have you updated to the latest version? Did you supply X and Y vectors
along with the 2D data?

Cheers,

David

I have not updated to the latest version. Everything else - yes.
Will try to update and see what it gives.

And, of course, you could supply an example, if you really want some
help. :-)

Cheers,

David
