Hello,

I am trying to write out a text file in IDL. I have string that I want to write in the file but would like to increase the spacing between the characters in the string. Is there a way to do that in IDL?

The string that I have is : 0.01 0.15 0.25 0.48 1.08 1.93 2.76 4.74 9.50

I would like increase the spacing between each character (between 0.01 and 0.15 and so on).

Thanks

```
IDL> a='0.01 0.15 0.25 0.48 1.08 1.93 2.76 4.74 9.50'
IDL> print,a
0.01 0.15 0.25 0.48 1.08 1.93 2.76 4.74 9.50
IDL> print,strjoin(strsplit(a,' ',/extr),' ')
% Compiled module: STRSPLIT.
0.01 0.15 0.25 0.48 1.08 1.93 2.76 4.74 9.50
IDL> print,strjoin(strsplit(a,' ',/extr),' ')
0.01 0.15 0.25 0.48 1.08 1.93 2.76 4.74 9.50
```
