Folks,

Hi,

I am preparing a histogram like this:

```
h = HISTOGRAM(x(2,*),BINSIZE = 20, LOCATIONS=hlocs)
p = BARPLOT(hlocs, h,FILL_COLOR='red',$
BOTTOM_COLOR='yellow', /XTICKDIR, /YTICKDIR,/vertical)
```

in the output bars have a small spacing between them, but i want the *bars* be continuus (bars be side by side).

can someone help please?

Cheers,

Dave
