Subject: fill_background in TEXT reference does not work
Posted by hannah_ue on Tue, 16 Jul 2013 09:08:28 GMT

Hi there,

in my program the FILL_BACKGROUND and FILL_COLOR properties in the TEXT reference in IDL 8.2.3 are not working - I expected to get a filled, non-transparent box in the chosen color and the text in it.
Has anyone an idea why this could be the case? Do I have to set additional properties which I missed..?

Thanks in advance,
Hannah

Works for me.

Cheers,

David
