A quick note: the IDL blog I maintain has been moved from Wordpress to the VIS website. The new location is:

<http://www.exelisvis.com/Company/PressRoom/Blogs/IDLDataPoint.aspx>

The domain "idldatapoint.com" should also eventually point to this site.

Maybe once idldatapoint.com points to it, I can find it. But, at the moment, Feedly reports that the above URL doesn't exist. :-)

Cheers,

David

I've been told there's no RSS feed yet, so you need to go directly to the long URL above.
