Hi,
How can I adjust character thickness when I use cgimage for plotting.

Hi,

Try:

```
cglImage, dist(400), MARGIN=1, TITLE='Title', /AXES, $  
AXKEYWORDS={CHARTHICK:4}
```

Hi,

Try:

```
cglImage, dist(400), MARG=1, TITLE='TEST', /AXES, $  
AXKEYWORDS={CHARTHICK:4}
```

Hi Fabien

How could we change, font type, and axis width in CGs please?

Cheers,

Dave

I personnally never needed to change fonts but I assume that

cgSet_TTFont would be a good place to start.

I don't understand what you mean with "axis width"...

Cheers

Hi,
Thanks, i mean axis line width:)
Cheers,
Dave

Ok, then I suggest that you have a look at the IDL documentation for the AXIS procedure and then use the AXKEYWORDS as suggested by the cgImage documentation.
