**Subject:** Tooltip for CW\_BGROUP?

I have a button group created with CW\_BROUP, and I'd like to add a tooltip for each button. CW\_BGROUP does not accept a TOOLTIP keyword, so the only way I know how to do this is to not use CW\_BGROUP and instead build the button group using WIDGET\_BUTTON. Or is there an easier way?

Thanks, --Wayne

I've never used CW\_BGROUP, but if you can get the button IDs out of it, you can use the TOOLTIP keyword with Widget\_Control.

Cheers,

David
