Some may have noticed that the IDL Astronomy Library (<http://idlastro.gsfc.nasa.gov/>) has been unavailable since October 1. It will remain unavailable until the a US budget is passed.
(Don't get me started on this topic !&*^%\$)

If anyone needs the latest version of the tar file it is available on a drop box at

https://www.dropbox.com/sh/io9s9qe8yva1g6r/j4V7BzRWNs/idl_au l

Do you happen to know if other NASA resources are similarly made available in backup locations? In particular, I'd be interested in Espenak's page about the upcoming solar eclipse of 3 November.

<http://eclipse.gsfc.nasa.gov/SEsaros/SEsaros143.html>

You can try

<http://web.archive.org/web/20130426061802/http://eclipse.gsfc.nasa.gov/SEsaros/SEsaros143.html>

Cheers, Heinz
