Hi all,
is anyone aware of any function in IDL already available to print a series of dates (a calendar) in the form:

Day of the week, Month, Day of the month:

Mon 11 1
Tue 11 2
...

Thanks.
Cheers!
Urz

Hi Urz,

You could use LABEL_DATE and JULDAY for this I think.

```
month = 10  
year = 2009  
day = 5  
PRINT, LABEL_DATE( DATE_FORMAT='%W %N %D',0,0,JULDAY(month,day,year) )
```
