Hi,

I want to plot many a series of pages on an eps file. I have i code like this

```
ps_start, fi=file,/encaps, charsize=charsize, scale_factor=scale_factor, xsize=xsize, ysize=ysize
for i=0, nt do begin
...
pos=posplot(1,1,1,3)
cgcontour, im1 , nl=100, pos=pos,/noerase,/iso
pos=posplot(1,2,1,3)
cgcontour, im2 , nl=100, pos=pos,/noerase,/iso
pos=posplot(1,3,1,3)
cgcontour, im3 , nl=100, pos=pos,/noerase,/iso
endfor
ps_end
```

Which doesn't work.

I've tried also

```
set_plot, 'ps'
device, fi=file, /encaps, xsize=xsize, ysize=ysize,/color, bits=16
for i=0, nt do begin
...
pos=posplot(1,1,1,3)
cgcontour, im1 , nl=100, pos=pos,/iso
pos=posplot(1,2,1,3)
cgcontour, im2 , nl=100, pos=pos,/noerase,/iso
pos=posplot(1,3,1,3)
cgcontour, im3 , nl=100, pos=pos,/noerase,/iso
erase
endfor
```

```
device, /close
set_ps, 'X'
```

but this doesn't work either.

Do you have any idea of what's wrong?

Thank,
Petros

An EPS file is, by definition, a single page file.

regards,
Lajos

Thanks Lajos,

I uses ps and it worked

Petros
