Subject: How to check the variables by myself ?
Posted by huiqiang.liu.37 on Fri, 21 Feb 2014 00:00:28 GMT

Hi, everyone,

programming with IDL , but i can not check the values of my variables defined by myself in the variables list , which always display 'undefined'. why and how?

Thanks.
Bruce Liu

You probably defined them in some program level that is different from the one in which you are trying to view them. Variables have "scope" and only appear in the level (program depth) in which they are defined.

Cheers,

David
