Hi

I was wondering if TVSCL can display more than two images at the same time. I displayed two images and everything was fine. Once I tried to display 3 images part of the third image couldn't display in the window. My code was like this:

```
TVSCL, image1, 0
TVSCL, image2, 1
TVSCL, image3, 2
```

Can anyone knows how to display more than 2 images at the same time next to each other?

With Thanks
G.

http://exelisvis.com/docs/WINDOW_Procedure.html

```
xsize = 650 ;Pixels  
ysize = 650 ;Pixels  
Window, /FREE, XSIZE=xsize, YSIZE=ysize  
TVSCL, image1, 0  
TVSCL, image2, 1  
TVSCL, image3, 2
```
