
Subject: Legends in IDL?

I've been trying to create a legend for a two-dimensional line graph in IDL. As far as I can tell from the manual, there is no easy procedure to do this. There is something to label lines, but nothing to set up a separate legend. I'm posting to ask if a) There is a built in procedure and I've just overlooked it or b) Someone out there has also encountered this problem and written their procedure to draw legends, and might be willing to share it with me.

If either of the above are true please E-mail me at adam@pet.upmc.edu

Thank You
