hi everyone

i am working on envi+idl

i have splitted a large file using `envi_get_data`
and `envi_enter_data`.

now i want to get the statistics of each splitted file .
kindly suggest

regards
sunil

Hi,

You can use routine `ENVI_STATS_DOIT`. You should call it by

`ENVI_DOIT,'ENVI_STATS_DOIT'`

Look the ENVI help to setup the necessary paremeters for your case.

If you will be use classification algorithms, then use routine `CLASS_STATS_DOIT`

regards
