Subject: Turn off "< Press Spacebar to continue, ? for help >"
Posted by lstagner89 on Thu, 06 Nov 2014 18:25:21 GMT

Hello,

I created the IDL IPython/Jupyter kernel so that I could use the notebook with IDL. It works using Pexpect which sends commands and then looks for the command prompt to signal when the command is complete. When I get the "< Press Spacebar to continue, ? for help >" prompt the command prompt doesn't show up and the IDL kernel hangs. Is there anyway to turn this off?

-Luke
