Why is Smiling a Donation?

(And smiling to your brother is donation). This is what the greatest Prophet (All Prayers and Peace of Allah be upon him) said and this is what the latest researches are discovering, so let's read

Researchers have studied about smiling influence on others. They have found that smiling contains strong information that can influence the human subconscious mind!

They found that everyone has his particular smile that no one can share with him. Moreover, every smile contains special effect, too. They photographed these smiles and showed it slowly, hence, they noticed some specific movements. Likewise, a person can have more than one kind of smiles, regarding his mental status, what is he speaking about and the person he is speaking to...

Some of the most important information of such researches, researches are talking about what you can give to others through the smile, because it is more than giving a material thing for the following reasons:

When smiling you can transmit joy to others, which is a sort of donation and which can be the most important. Studies showed that sometimes man may need joy and gladness more than food and drink. Also, that joy can treat many diseases starting by heart problems.

Through the smile you can transmit information to others very easily, because a word with a smile has more influence on the brain. Magnetic resonance imaging has shown that expression influence changes too much with a smile. The expression is the same, however, the influenced brain parts differ according to smile type accompanying this information or this expression.

You can calm an atmosphere stain of a given situation with a soft smile. This cannot be done with money. Hence, smile is worthier and more important than money. So, the less you can give to others is smile donation.

Smile and recovery: Many doctors have noticed smile influence on recovery. Therefore, some researches declare that the doctor's smile is a part of the treatment! Then, giving a smile to your friend, your wife or your neighbor, you are giving them a free remedy prescription without feeling, and this is a kind of donation.

For these reasons and others, smile is considered as a sort of donation, giving and generosity. And now dear reader, do you realize why did the prophet of compassion (All Prayers and Peace of Allah be upon him) say: (and smiling to your brother is donation)!!
