Subject: Contour annotations Posted by jl386 on Tue, 27 Jan 2015 21:32:34 GMT

Hi all,

I am trying to add contour annotations to a plot, in the old version of contour you simply did c_annotations=["label 1", "label2"...] but in the function form contour() I cannot find the equivalent command. I know I can open the contour properties and do it manually, but I'd like to automate the process.

Any tips would be greatly appreciated!
