Hi guys,

I am looking forward to IDL 8.5. I hope it will come with support for MAC Yosemite.
Do you know when it is supposed to be released?

Thank you,
nata

I assume 8.5 will support Mac Yosemite since 8.4 supports Mac Yosemite. Well, not officially, but I haven't had any problems in months of using 8.4 with Yosemite.

Exactly, non officially...

I use IDL 8.2 and I do have problems. I will upgrade my license when the new version will be released. The thing is that they never say when, that is why I'm asking...

Hi nata (and Wayne!),

It's still going to be a few months before IDL 8.5. We're just releasing a service pack (8.4.1) now. But like Wayne said, IDL 8.4 works fine with Yosemite. I've been using it at home ever since Yosemite came out, and haven't run into any issues. There are a *lot* of new features in 8.4, so at least in my very-biased opinion, it's worth upgrading now. :-)

Cheers,
Chris

Hi Chris - when do you anticipate the 8.4.1 service pack becoming available?

Thank you!

Caroline

Oops, never mind looks like the service pack is available and fixed the problem I was having. Thanks.

Hello,

Good news, but I could not find the 8.4.1 update when connecting to the general Exelis site. What is the right path ?

alain.
