Everything is in the title.
The crash is immediate while using the Workbench.
When using the command line, IDL has time to confirm that no lambda fuction is defined...

alx.

Ouch... This hurts.
I can confirm the same behaviour on my 64bit Win7 machine with both 32 and 64 bit IDL versions.

{ x86 Win32 Windows Microsoft Windows 8.4 Sep 27 2014 32 64}
{ x86_64 Win32 Windows Microsoft Windows 8.4 Sep 27 2014 64 64}

Cheers,
Helder

Update to v8.4.1:

IDL> help,/lambda

Lambda Routines:

Number of routines: 0

IDL> print,!version

{ x86_64 Win32 Windows Microsoft Windows 8.4.1 Feb 17 2015 64 64}

Ok. Corrected in 8.4.1.

Thanks for the tip.

alain.
