Dear all,

I have a map which plots field of view of radars in the northern hemisphere and another map in the southern hemisphere for southern hemisphere radars.

Now, I would like to plot the southern hemisphere fields of view radars in the northern hemisphere map with both southern and northern field of view.

I have latitudes and longitude for all radars.

Please can you suggest how to do such mapping ?

Thank you in advance for your time

Regards
Zolile
