Subject: Mapping southern in Northern map Posted by zolile mtumela on Mon, 04 May 2015 14:05:05 GMT View Forum Message <> Reply to Message

Dear all,

I have a map which plots field of view of radars in the northern hemisphere and another map in the southern hemisphere for southern hemisphere radars.

Now, I would like to plot the southern hemisphere fields of view radars in the northern hemisphere map with both southern and northern field of view.

I have latitudes and longitude for all radars.

Please can you suggest how to do such mappping?

Thank you in advance for your time

Regards Zolile
