hi

is there a function to draw polar coodinate image?
for example matlab`s pcolor.

<https://nf.nci.org.au/facilities/software/Matlab/techdoc/ref /pcolor.html>

i would like draw second figure(link, polar coordinate image).

i can draw the image using "polygon"(new graphic) function. but this way very slow.

is there another way to darw the image?

thanks
