
Subject: Modal dialog missing close button on Linux

Hi all,

When I create a dialog box for example:

```
self.tlb = Widget_Base(Title='Hello there', Column=1, /Modal, $  
  /Base_Align_Center, Group_Leader=groupleader, Uvalue=self)
```

It's missing the close button on Linux (CentOS 7 - Gnome 3). If I remove /Modal the close button appears.

Has anyone else had this problem? Is there any known workaround?

IDL 8.4

Thanks,
Tim
