i have opened a jpeg image of sun using
read_jpeg,'solar.jpg',image,true=1

and now i want to work on region of interest i.e. the central part of the image,, for that i used

XROI in the command line
I got the xroi window , but when I clicked on solar.jpg to open I am getting an error report as

Attempt to call undefined procedure / function : 'READ_IMAGE'

Please someone let me know how to resolve this problem.....
