The IDL help pages cannot be accessed due to HTTP 403 error. This is current as of 1050 CDT
25 June.

When it was error 403 I could not get any exelisvis webpage to load so I could not get to the
"contact us" link. I figured that if I posted here somebody from the company would see it.

Anyway, it now works since I got back from lunch. Looks like some updates were made to the site
layout so I guess the pages were locked out either intentionally or accidentally for a while.
