Hello All,

Suppose you have data with the following dimension

data = [144,73] ; longitude X latitude

land = LAND_MASK(/NAMERICA,lat=lat,lon=lon,Limit=[-170,30,-50,75],resolution= [2.5,2.5])

Land_mask function provide the following dimension for north america domain

land = [48,18]

It should have given the following dimension

land =[49,17]

What am i missing ?

Thank you for you help

Best regards
