LAMP (Large Array Manipulation Programm) for IDL 3.6.1 to 4.0.1 is now available by ftp at :

>>>>>>>>> ftp.ill.fr in directory /pub/cs <<<<<<<<<<

Both Unix and VMS versions are present.

It should suit many needs ! Just try and let us know what you think !

Any further feedback: comments, remarks,
constructive criticism would be really appreciated.

Read first the AA_README file or open with your favorite WEB navigator the following URL and choose the INSTALLATION README Button.
