Subject: A new IDL package Posted by lamp on Wed, 20 Dec 1995 08:00:00 GMT View Forum Message <> Reply to Message

LAMP (Large Array Manipulation Programm) for IDL 3.6.1 to 4.0.1 is now available by ftp at :

>>>>>> ftp.ill.fr in directory /pub/cs <<<<<<

Both Unix and VMS versions are present.

It should suit many needs! Just try and let us know what you think!

Any further feedback: comments, remarks, constructive criticism would be really appreciated.

Read first the AA_README file or open with your favorite WEB navigator the following URL and choose the INSTALLATION README Button.
