How can I put label my data on the scatter plot ?

```
data_1 = cgDemoData(1)+ RandomU(seed, 10) * 10  
data_2 = cgDemoData(1)+ RandomU(seed, 10) * 10  
cgScatter2D, data_1, data_2
```

I would like to label the result from scatter plot numbers from 1 to 10 or any string array

Best wishes !
