Hello everyone!

I have some issues with the positioning of a legend for my plot...

I'd like to place the legend outside of the plot. Is that possible?

If I use the command below, the legend is in the top right corner but only partially visible...It seems like the extent of the plot window is too small.

```
leg = LEGEND(TARGET=[myplot_1989,myplot_1990], FONT_SIZE=9, POSITION=[1.025,0.925])
```

Cheers,Kai

Ok I just found it out.

By using the MARGIN keyword I was abled to enlarge the window frame!
