
Subject: IDL 7.1 help system crashes

Posted by [DK](#) on Mon, 23 Nov 2015 02:36:40 GMT

[View Forum Message](#) <> [Reply to Message](#)

Hi,

I am using IDL 7.1 under Window 7 (64 bit) for a long time, but several days ago the HELP system suddenly crashed and other functions were just fine. I guess this is a Java problem so I tried reinstalling IDL and java but nothing helpful.

Do you have any solutions? Thanks!

Here is the content of 'hs_err_pid1212.log' found under 'D:\Program Files (x86)\ITT\IDL71\idlde' after the crashing:

```
#
# An unexpected error has been detected by HotSpot Virtual Machine:

Hi

What version of Java do you use ?
I had similar problem with IDL 7.0

I fixed it by reinstalling Java to early version of 1.5
Try to install Java 1.5 with early versions, like Java 1.5 update ~5

I downloaded the latest version of Java which is 1.8... Maybe that is the problem, I'll try the old version 1.5... Thanks a lot :)

cheers,
DK
