Hi,

I am trying to create tabular columns inside an image window that will contain text and image side by side. I am currently using just text(). For example:

```
tsurvey_dt=text(0.274,0.6,'SURVEY DATE'+  
    '+ S_DATE,FONT_SIZE=6,FONT_NAME='Helvetica')  
tsurvey_dt.POSITION=[0.258,0.6]
```

Kindly notice the dropbox link that helps understand the problem better. Thanks!
