when I try to plot two lines,the first point of second line start from the point of first line as
Mark the two end points of the profile.
From: (113,   276)
To (452,   440)
Mark the two end points of the profile.
From: (452,   440)

I want to choose the start point of the second line, how?

I would start here:

   http://www.catb.org/~esr/faqs/smart-questions.html

Cheers,

David
