Dear All,

I use cgWindRose code that was written by David Fanning. I had got the following error although I ran all code subroutine very well.

Traceback Report from CGLEGENDITEM::INIT:

```
Tag name ALIGNMENT is undefined for structure CGLEGENDITEM.
Execution halted at: CGLEGENDITEM::INIT 333 C:\Documents and
Settings\Focus\Desktop\windrose_plot (2)\cgLegendItem__init.pro
CGLEGEND      200 C:\Documents and Settings\Focus\Desktop\windrose_plot
(2)\cglegend.pro
CGWINDROSE    428 C:\Documents and
Settings\Focus\Desktop\windrose_plot (2)\windrose_plot.pro
WINDROSE_PLOT 37 C:\Documents and
Settings\Focus\Desktop\windrose_plot (2)\windrose_plot.pro
$MAIN$
```

How can I correct this error?

Cheers

Khaled

These are the steps I take to solve this kind of problem:

https://www.idlcoyote.com/code_tips/fixcoyoteprogram.php

Cheers,

David
