I had a big smile reading Mike Galloy's "Tao of IDL" blog post this morning.

"Poetry" might be an ambitious claim.

Mike

Haha, great one, thanks!! When I read:

> Backwards compatibility is great!
> But it doesn't mean you should index arrays with parentheses forever.

I had to think of that one:

```
IDL> I = list([1,2,3], 'test')
IDL> I[0][1]
```

```
I[0][1]
^
% Syntax error.
```

Here I would welcome the loss of backwards compatibility ;-)

Cheers,

Fabien

IDL> l = list([1,2,3], 'test')

IDL> l[0,1]

2

Even less typing :-)

regards,
Lajos

Ah! I always forget about this one. Maybe because it looks funny:

```
IDL> l = list(hash('a', 1), 'test')
IDL> l[0, 'a']
1
```

Thanks for reminding me ;)
