Hi everyone,

Please answer the following

1--How can I segment image using region growing technique in IDL????

2--How we can write code for automatic threshold detection for different land classes????

Thank You.

Excellent topics for a graduate thesis! Let me know when you find the answers and I'll help you publish your book on Amazon.

Cheers,

David

IDL's REGION_GROW routine might be just what you're looking for:

http://www.harrisgeospatial.com/docs/REGION_GROW.html
