Dear all

I have some problem. In IDL command line I wrote addpath and I got this error "% Attempt to call undefined procedure: 'ADDPATH'. % Execution halted at: \$MAIN\$" could you help me how I can solve it. Thank you Best, Hadi

Subject: Re: % Attempt to call undefined procedure: 'ADDPATH'. % Execution

halted at: \$MAIN\$

addpath.pro is not a procedure included with IDL. addpath.pro written by Tim Robishaw a while back I happen to use a procedure named

http://w.astro.berkeley.edu/~dperley/programs/idl/addpath.pr o

If you are using this procedure -- or any other procedure named ADDPATH -- then you need to make sure it is included in your !path
