Dear all

I have some problem. In IDL command line I wrote addpath and I got this error

"% Attempt to call undefined procedure: 'ADDPATH'. % Execution halted at: \$MAIN\$"

could you help me how I can solve it. Thank you

Best, Hadi

addpath.pro is not a procedure included with IDL. I happen to use a procedure named addpath.pro written by Tim Robishaw a while back

<http://w.astro.berkeley.edu/~dperley/programs/idl/addpath.pro>

If you are using this procedure -- or any other procedure named ADDPATH -- then you need to make sure it is included in your !path
