Subject: HP idl can't find libcl.sl

We are running HP 9.0.7 with a suitable number of patches. I could have sworn that idl 4.0.1 was running fine on this platform some weeks (and perhaps, patches, ago). Now when it is invoked, the linker complains:

```
/lib/dld.sl: Can't find path for shared library: libcl.sl
```

```
/lib/dld.sl: No such file or directory
```

```
abort - core dumped
```

Any suggestions?
