Subject: lego option with surface
Posted by gokhan on Tue, 05 Mar 1996 08:00:00 GMT

I am sorry if this question has been asked before.

When I use the lego option with the surface procedure, I get some extra
coordinate lines and tick marks. Without the lego option, surface works fine.
Is there a way to eliminate these extra lines and marks? Because I am not
a regular reader of this news group, you may directly e-mail me at
gokhan@ncar.ucar.edu. Thanks in advance.
