Subject: character thickness of contour labelling Posted by f055 on Thu, 11 Apr 1996 07:00:00 GMT

Is there any way to alter the character thickness of contour labels? I do not mean each one individually (although that would be nice, via c_charthick), but all of them. Setting !p.charthick to (e.g.) 3. makes the axis labelling etc. thicker, but has no effect on the contour labels. (IDL 4.0 by the way).
