Subject: passing idl structures in call_external ?
Posted by csoelle on Thu, 04 Apr 1996 08:00:00 GMT

As the subject already says, does anybody know how to pass idl-structures
to a C-function using CALL_EXTERNAL. I couldn't find anything in the help
nor in the example programs supplied.

Did I miss something ? Is there anyone who can shed some light on this
problem ?

Regards,

  Christian
