---

Using IDL I am trying to use show3 with an image .  
but my problem is that input parameter of show3 is only an array.  
It is not possible to specify X and Y values corresponding to this z image.  
So i am trying to modify show3 code to do it.  
changing parameters of surface is easy.  
But i didn't succeed with polywarp.  
In fact my x and y values are starting as negative values.  
Is anyone know how to do this or where i can find such program on the net.
